“Customize” your Essex Park Home

There are a dozen different plans available in the Essex Park portfolio of homes - a variety of 1 story, 1 ½ story, and 2 story homes. Working with your Project Manager you can be assured that you will find the home that fits you and your family.

Each of the Essex Park home plans comes with a variety of available elevations - Classic, Craftsman, and Traditional. To a certain extent Coolman will even “customize” your elevation to address personal wants and taste.

Coolman tried to anticipate almost every lifestyle issue with the full range of product we offer within our portfolio.

We realized that every family is different and may want certain “custom” modifications to the plan that comes closest to meeting their needs. Within the constraints of our “Value-Plus Engineering” program, we will work to accommodate changes that will enhance the livability of your home.
