Construction Time Frames

Have you ever heard the story about the contractor who told all of his homebuyers that their home would be completed in May? It may be in October, or it may be in January.

Well, if you haven't heard that story, you've heard one just like it – or worse. That's why, for 25 years, we've included guaranteed delivery dates in our Purchase Agreements.

Your Project Manager can go over the details with you, but essentially here's what you can expect – we'll schedule your home to be delivered in about 100 days, and guarantee that it'll be completed in 120 – or we pay a \$45.00 a day penalty. (Winter construction adds 30 days.)

And when we say that it'll be delivered, we're not talking about a home that's "almost" finished. Our internal process systems insure that your home will be completely ready for you to move into, on time!!
