

We thought you'd like to know...

Energy Conservation

Every home built by Coolman Communities complies with the U.S. Department of Energy's "Energy Star" program to accomplish the following:

- Reduce utility bills
- Provide healthier indoor air
- Lower maintenance costs
- Provide a more comfortable and quieter home
- Offers broader financial consideration
- Help protect the environment

In fact, the NU-WOOL WALLSEAL insulation system we use does such an outstanding job of insulating your home, we'll ***guarantee*** your heating and cooling bills for the first two years you're in your home. Visit with your Project Manager to get all of the details.
