

simply serene.

There's something new blooming on the prairie: exquisite homes, individually tailored, offering the serene surrounding of blue stem grass and coreopsis. The Prairie at Aberdeen proves that simplicity and sophistication combine to create stunning homes, and that nature should be nurtured and enjoyed. This unique new neighborhood – by innovative, award-winning builder Coolman Communities, Inc. – will be unveiled in September, 2005. You are invited to visit now and discover how restorative a little house on the prairie might be.
